

## Technology Manager (Permanent)

### Location: Naas, Co Kildare

#### Company Profile:

OpenSky a European challenger brand to the large global software consultancies, delivering digital innovation across Government, Transport and Environment sectors in the UK and Ireland.

Due to business growth, OpenSky have a new role for a Technology Manager – Microsoft Stack (Dynamics 365 CRM, .NET, Microsoft Cloud). This an excellent opportunity for an experienced technology professional to utilise their skills and experience in an international working environment working with innovative technologies and solutions.

#### Why Join our Team:

OpenSky is a dynamic, exciting place to work. We hire exceptional people, and every one of them is empowered to think independently, take initiative and be innovative in their job. We are committed to ensuring that our performance and reward strategies are designed to effectively support our employees at every opportunity and offers an excellent work-life balance.

At OpenSky our employees enjoy the creative, agile and meaningful work they do, the resources and technology they have access to and the benefits we offer. The projects we work on make a real difference, and that's what makes us distinct in our industry. This very factor means that our employees get to work with the latest and emerging technologies.

We've built a truly unique culture here at OpenSky, where our employees are always learning, challenged with interesting projects and rewarded with fantastic benefits. We attract talented individuals from a wide range of cultural, geographic and educational backgrounds whom bring with them a rich variety of skills and experiences.

Our plan is simple; we hire the best people whom possess the skills, talent, expertise, experience and motivation that we require and when we find them, we help them grow, develop and achieve their goals.

The values we share help us to thrive and succeed, both as individuals and as a team. If you share those values, you'll fit right in!

## The Job:

You will be a technology professional, either with prior experience in leading the technology direction of an organisation or as an experienced software architect looking to take the next step in your career. You will work as part of the senior management team maintaining and growing OpenSky's brand as a leading technology innovator. You must have solid experience in Enterprise software architecture to apply for this role.

- Working with the Director of Technology to set the technology strategy for the company and leading the implementation of the agreed strategy
- Leading the R&D and Technical Excellence areas of the business
- Advising engineers on a day to day basis including 1:1's, assisting on performance management, skills and career progression
- Working with the Delivery Managers and Technical Leads to ensure technical solutions are of the highest quality, exceed expectations and are architected to guarantee business needs are met while minimising cost of implementation
- Working with the Delivery Managers to set and track Objective and Key Results for teams and individuals and contributing to the overall objectives for technology and engineering
- Promoting & increasing productivity within teams by ensuring they have all the resources they require, through working with Operational Leads to introduce tools and lean processes
- Sharing improvements across teams to improve productivity for the whole engineering department, such as code re-use, knowledge sharing, and build vs. buy decisions are important areas for this role
- Ensuring the company technology strategy is adhered to when architecting / implementing software deliverables
- Reviewing architecture proposals and sales bids to ensure scalability and robustness of enterprise systems developed
- Contributing to Pre-Sales in a Technical role, to build Response to Proposals, customer presentations, solution estimates & technical approach

## Essential Skills:

- Experience in leading technology strategy, ideally in a software consultancy environment
- You must have solid experience in Enterprise software architecture
- Degree in Computer Science or similar related discipline
- Must come from a Software Architect background
- You will come from an engineering discipline and are confident conversing about technology at a deep level
- Strong familiarity with DevOps practices and continuous delivery environments
- Must have knowledge & technical skills across Microsoft Dynamics CRM
- Clean driving Licence and ability to travel freely in UK/EU area

## Desirable Skills:

- TOGAF® certification would be advantageous
- Desirable to demonstrate experience in Microsoft Cloud solutions

- Desirable to demonstrable experience in the full stack .NET software development lifecycle from requirements gathering to supporting an application with a large installed user base

#### Personal Skills:

- Excellent communication skills in both written and verbal English
- Excellent business process awareness
- Ability to work autonomously and on own initiative
- Motivated self-starter with experience in a fast moving and fast scaling environment

#### We Offer:

You will form part of a high-performance team, working together to deliver projects of national and international importance changing the way large Business and Governments work.

- Competitive Salary – market adjusted
- Continuous Professional Development
- Education Assistance Programme
- Company Pension
- Incremental Increases in Annual Leave
- Employee Assistance Programme (EAP)
- Annual Health Screening
- Employee Referral Scheme
- Ethical Employer
- Friendly, fast paced atmosphere
- International working environment in a growing company
- Work with innovative technologies & solutions
- Microsoft Dynamics & Personal development programmes
